

Army Will Form Reserve Units, Says Department

WASHINGTON. — The war department announced that activation of organized reserve corps units would begin this summer as a third step in the creation of the postwar army.

The entire program, if completed, will provide the nation with a reserve of military strength at least six times greater than existed in 1920 when the regular army, national guard and reserves together mustered a total of only 36,330 men.

Currently more than 22,000 officers of World War II have accepted commissions in the reserve, and about 300,000 enlisted men have signed up. The exact number and type of units to be activated cannot be set until the postwar army program has been finally approved by congress.

Servicemen's Wives Find \$20 Bills in Mail Boxes

PALO, N. Y. — Two servicemen's wives opened their mailboxes recently and discovered \$20 bills. The bills were found among the mail of residents of the Lakewood housing development, but no donors were discovered.

Police assured Mrs. James Calamia and Mrs. Walter P. Schroeder that the bills were bona fide, but no one could explain their presence in the envelopes.

How women and girls may get wanted relief from functional periodic pain

Cardui is a liquid medicine which many women say has brought relief from the cramps, aches and pains of their menstrual periods. It is a new strain of functional periodic medicine. It's how it works:

1. Taken like a tonic, it builds up the system, aids digestion, and gives the body the strength to resist the "blues" to come.
2. Started 3 days before the start of the period, it builds up the system, aids digestion, and gives the body the strength to resist the "blues" to come.

Russians Use Sun's Rays To Fire Their Boilers

MOSCOW. — A powerful mirror installation which captures the sun's energy has developed boiler steam pressure of two atmospheres (24 pounds per square inch) during a 30-minute demonstration at an Uzbekistan preserve factory, a Pravda dispatch from Tashkent said recently.

The heliostat was developed under the guidance of Dr. Federico Materni, head of the Helio Laboratory Power Institute of the Academy of Sciences of the U.S.S.R.

The inventor was said to be working on the problem of applying it in other industries to effect economies in production.

Starving Ext 'C' in China: UNRRA Flies Food

SHANGHAI. — Emergency distribution of food by air to China's starving people is being organized by UNRRA in an effort to combat a famine so severe that several million are reported eating grass, roots, the bark of trees and even clay.

Major General Chennault, once head of the famed Flying Tigers and former commanding general of the 14th air force, disclosed he is forming an air transport unit to fly UNRRA relief to stricken China. "Transport is necessary because of the difficulties faced by land and sea travel," he said.

Chennault is seeking former members of his old American volunteer group to participate in the flights.

Czech Radium Taken To U. S. in Secrecy

TOKYO. — Headquarters announced that 1.73 kilograms of radium seized from the Czechoslovak consulate at Osaka in 1939 by the Germans had been delivered to the U.S. embassy in Washington.

Transfer of the valuable shipment across the Pacific was carried out in secrecy.

Urea Wound Powder Used on Livestock

During World War II, two medical corps officers, Holder and McKay, and later, Dr. Hunter, reported astonishingly efficient results in handling contaminated wounds by local application of a powder made by mixing urea with sulfanilamide and sulfathiazole.

The advantages of such powder are obvious as the urea not only aids greatly in dissolving and riding the wound of necrotic or dead tissues cells, but also greatly increases the antiseptic properties of the two sulfa drugs.

A urea-sulfonamide mixture has now been offered to the veterinary profession and to the farmer. Currently this formula promises to replace most of the so-called wound powders containing lime and alum, formerly used to dust on wounds of livestock. It is also widely used in the urea-bilirubin hold down infection after birth of young and is also incorporated in ointment bases for use on skin infections.

Old College 'Rah' Is Displaced

Spout Spring, June 11. — Rev. J. S. Moore gave his congregation a fine sermon at Matthews Church Sunday A. M.

Serious War Veterans Have No Time for Frivolity.

COLUMBUS, OHIO. — Seriousness and intensity of purpose have largely replaced the old "rah rah" spirit on America's campuses. Dr. Bland L. Stradley, vice president of Ohio State university, said recently.

Dr. Stradley credited the student war veteran with setting the pace for the new approach to scholastic work.

He pointed out that of Ohio State's record-breaking 16,113 enrollment, 6,800 were in schools under veterans' benefits and another 1,000 veterans were there without claiming veterans' privileges.

"Scholastic records compiled at the university recently showed the former commanding general of the 14th air force, disclosed he is forming an air transport unit to fly UNRRA relief to stricken China. "Transport is necessary because of the difficulties faced by land and sea travel," he said.

Hixburg

Hixburg, June 10. — Rev. J. S. Moore gave his congregation a fine sermon at Matthews Church Sunday A. M.

Dr. and Mrs. Joseph Alsop and his mother, Mrs. Majorie Alsop, were visiting relatives in the neighborhood Sunday.

The Presbyterian Conference for young people opened at Holiday Lake today.

Mae Gilliam Cleland is back in the neighborhood and will be with her relatives for awhile. We enjoy having her with us.

Mrs. Lester Sears is back in the Sears' home after finishing up her school work in Portsmouth. We are very glad to welcome Margaret in our midst.

Mr. and Mrs. Bernard Cary and son, Jaywood, of Richmond, and Mrs. E. W. Gilliam were supper guests of Mrs. J. R. Marshall Sunday night.

Benard Cary is up in Jovana's days with Jack Marshall. He is having his vacation this week.

The home demonstration club met with Mrs. Percy Sears Thursday P. M. Mrs. B. G. Anderson discussed interesting subjects and she brought useful information to the members.

Truman veos Case bill.

Teeth of Cats Can Be Transplanted, Report

CLEVELAND, OHIO. — Two research workers have shown that growing teeth can be transplanted successfully from one kitten's jaw to another.

Possibly, said Dr. Harry H. Shapiro of Columbia university, further experiments may indicate similar transfers could be made in human beings. He and Dr. Berneice L. Maclean of Hunter college, New York, reported the results recently to the annual meeting of the American Association of Physical Anthropologists.

Portage of Food Worries British

WASHINGTON. — Twenty special investigators are in Europe seeking evidence on the transfer of German assets in this country to corporate fronts. Attorney General Clark told the Associated Press.

In an interview Clark estimated that the Nazis transferred control of approximately a billion dollars' worth of American properties to "trusted individuals" in this country.

"Through corporate intermediaries the Germans hoped to hide ownership of certain corporations, patents, and other properties in the United States," he said.

"They anticipated the possibility of war between the two countries long before 1941 and remember the experience of the last war, when they lost properties in the United States."

"So they went through a carefully calculated series of cloaking transactions in which they put their American properties in the hands of individuals they believed they could trust."

Clark said Swiss and Swedish neutrals and even some naturalized Americans acted as fronts for the Germans in these maneuvers.

All the properties involved have been taken over by the alien property custodian from the theory that they were owned or controlled by Germany," the attorney general said.

100 Cases Under Trial.

"More than 100 cases involving this property are in litigation," he said, "and others are sure to come up. The object of our European investigations is to develop evidence so when a neutral maintains he owns one of these properties, the government can prove that it is German-controlled."

The justice department's special mission in Europe "has turned up considerable documentary evidence to support the government's view, and we expect to find more," Clark said.

Edward Rhetts, chief of the mission, was here for several days of the investigation with Clark. He then returned to Germany with new instructions.

"What we are primarily interested in are the corporations controlled by the Germans," he said. "It is the justice department's contention that these holdings now belong to the American government."

Production of Penicillin Shows Increase of 300%

WASHINGTON. — The penicillin production rate has tripled since December, the government reported, but there is still only meager output of a companion drug—streptomycin.

The Civilian Production administration estimated the April supply of penicillin at approximately 2.78 billion units, compared with about 700 million units a year ago. This big increase, plus the fact domestic requirements begin to fall off in the spring, has made it possible to fix export allocations at a new high level.

Production of streptomycin, CPA said, still is too low to meet even military requirements. Despite this, 22 per cent of the April supply has been allocated for civilian and research purposes, the agency said.

Insulin Shortage Seen In Meat Market

WASHINGTON. — Senators were told that a shortage of insulin and other medicines is threatened as a result of a black market in meat.

G. L. Childers, a Houston, Texas, packer, explained to the senate agriculture committee that insulin and many other pharmaceutical products are made from cattle glands. He said that the manufacturers are not getting the glands because black market slaughterers, unequipped to save them, throw them away.

In support of his statements, Childers read letters from several children's parents in which they begged the committee to force the manufacturers of pharmaceuticals.

Bride Flies Ocean, but Death Beats Her to It

NEW YORK. — Mrs. Mary Miller, blond British actress, arrived from England by plane to learn that she had lost her race to be by her husband's bedside before he died.

She collapsed when informed that her husband, Donald Miller, an employee of Pan American World Airways, died at San Francisco of auto injuries received March 28.

Ration Card's Ready for Those Who Visit Canada

OTTAWA, ONT. —Tourists visiting Canada for seven days or longer may apply for special temporary ration cards, the price board said recently. Officials said the arrangement was designed to provide for tourists who have their own summer cottages in Canada or plan to visit friends and relatives. Those stopping at hotels or boarding houses will not require ration cards.

Nazi Assets Are Hunted in U. S.

WASHINGTON. — Twenty special investigators are in Europe seeking evidence on the transfer of German assets in this country to corporate fronts. Attorney General Clark told the Associated Press.

In an interview Clark estimated that the Nazis transferred control of approximately a billion dollars' worth of American properties to "trusted individuals" in this country.

"Through corporate intermediaries the Germans hoped to hide ownership of certain corporations, patents, and other properties in the United States," he said.

"They anticipated the possibility of war between the two countries long before 1941 and remember the experience of the last war, when they lost properties in the United States."

"So they went through a carefully calculated series of cloaking transactions in which they put their American properties in the hands of individuals they believed they could trust."
